Personal Summary

A talented developer with a strong academic background. Ability to think through a problem coupled with the confidence to make ideas heard. A proven ability to maintain and enhance company software to improve operational functionality in line with business requirements. I'm currently looking for a software developer opportunity that will allow me to work alongside an expert team of developers. Thereby helping to drive my career progression to more senior roles in the future.

Education

- Flutter Advanced bootcamp from July 2025 to Nov 2025
 - Elevate Tech
- Flutter diploma from July 2023 to Nov 2023
 - Route Academy (Alexandria Branch)
- Front End & Cross-platform ITP Track from April 2022 to Aug 2022
 - Information Technology Institute (ITI) (Alexandria Branch)
- Bachelor Of Science in Physics and Computer Science, Class 2019 (Helwan University)
 - Graduation Project: College Assistant Application (Excellent Grade)

Work Experience

- Senior Flutter Mentor at Route Academy (May 2024 – Present)
 - o My responsibility is to guide students in route by teaching flutter, mark and review their code and send them feedback to enhance their code and teach them extra and advanced topics.
- Software Engineer (Game & VR Developer) at Bibliotheca Alexandrina (Jan 2024 – Present)
 - o Created immersive 3D and VR environments with Virtual Immersive Scientific and Technological Applications (VISTA) team, aimed at aiding researchers in visualizing data, employing both Unreal Engine and Unity. Collaborated with researchers to grasp their requirements and transform them into practical, user-centric virtual environments.
- Teaching Assistant at Egypt-Japan University of Science and Technology (Oct 2022 – Jan 2024)
 - o My responsibility is to guide students in the Computer Science field through teaching Software Engineering, Fundamental of programming, Advanced programming and OOP Concept, Operating Systems, how to use Linux and interact with command line, Embedded Systems, Network and Computer Graphics.

Technical Skills

- **Frameworks:** Angular, React Js, React Native, Flutter.
- **Software:** Visual Studio, Android studio, Android SDK, Unity Engine, Unreal Engine.
- **Languages:** C++, HTML5, CSS3, JavaScript, Typescript, Dart, Python, C#.
- **Tools:** Bootstrap5, PrimeNG, Git & GitHub.

Extracurricular Activities

- Scientific Committee member, Students' Union, Nov2017 to Oct 2019.
- Oct 2016 to 2018, IT team leader, Egabion Student Activity.
- Sep 2015 to May 2016, SR member, Inception Student Activity.

Trainings & Workshops

- NASA Space Apps Cairo Hackathon, 6 & 7 Oct 2023
 - Project: Developing Mobile App to book space travels.
 - Technologies: Flutter, Dart
- NASA Space Apps Cairo Hackathon, 19 & 20 Oct 2018.
 - Project: Developing a website for showing the data of satellites launched by NASA.
 - Technologies: HTML, CSS, JavaScript.
- 7th Space Weather Summer School, 27 Aug 2018 – 6 Sep 2018.
 - Project: Study the period of life of sunspots at the surface of the sun.
 - Technologies: Image Processing using MATLAB.
- Space Weather and Space Navigation, International Workshop, 3-4 Oct 2017.
 - Publish a poster for solar cell parameters measurements using Arduino and its application to SANSa Space Agency.
- SWMC Summer School, 20 Aug 2017- 30 Aug 2017.
 - Project: Solar Tracker => Solar panels track the sun to charge batteries.
 - Technologies: Arduino, Objective C, Hardware Components.

Projects

- BA_WayFinding Project
 - It is a project to navigate inside Bibliotheca Alexandrina and find your way.
 - This project developed by using unity engine and C#.
 - Implement A* algorithm to find shortest path and graph data structure.
 -
- Flower App
 - A modern Flutter e-commerce application built with Clean Architecture.
 - The app allows users to browse products, add them to cart, and manage orders efficiently.
 - Technologies: Flutter, Dart, APIs, state management (Cubit).
 -
- Flowery Driver
 - A modern Flutter Flowery application built with Clean Architecture.
 - The app allows the driver to browse orders, pick it up from the store, and manage to deliver it to the user.
 - Technologies: Flutter, Dart, APIs, state management (Cubit).

- Islami Application
 - Flutter application contain 4 features: Quran, Hadith, Sebha Radio.
 - Technologies: Flutter, Dart, Reading Files, APIs, state management (provider).
- To-Do Application
 - Flutter application to organize all tasks you can add, edit, and delete tasks.
 - Technologies: Flutter, Dart, Firebase, MVVM, state management (provider).
- Happy Paws Animal Platform
 - Angular web app that has all services and supplies for animals.
 - Technologies: Angular, HTML5, SCSS, Bootstrap5, Primeng, NgRx, PWA & Firebase.
- Yummy Taste
 - Angular web app for food recipes.
 - Technologies: Angular, HTML5, SCSS, Bootstrap5, Primeng, NgRx, PWA.
- College Assistant Application (Graduation project)
 - Android mobile application to facilitate communication between students, faculty and trainers.
 - Technologies: Android, Java, XML, Firebase.

Language:

- Arabic (Mother-Tongue)
- English (Very Good).
